UMAR ALI

Aspiring Cloud & DevOps Engineer | AWS | Terraform | CI/CD

mianumarali7221@gmail.com | linkedin.com/in/umar-ali-043b13274 | github.com/Umar-Ali14 | Lahore, Pakistan

SUMMARY

BBIT student at the University of the Punjab focused on AWS Cloud Engineering and DevOps. Built hands-on projects involving GitHub Actions CI/CD with IAM OIDC, event-driven AWS cost monitoring using Lambda and CloudWatch, and Terraform modules for multi-environment infrastructure. Seeking a remote Cloud/DevOps internship to contribute to practical infrastructure projects while developing skills in automation, containerization, and cloud operations.

TECHNICAL SKILLS

- **AWS:** EC2, VPC, S3, IAM (roles, OIDC federation), Lambda, CloudWatch, CloudFront, Route 53, DynamoDB
- **Infrastructure as Code:** Terraform (reusable modules, multi-environment layout, tagging, version pinning)
- **CI/CD:** GitHub Actions, AWS CLI, automated S3 deployments
- **Linux & Scripting:** Linux command line, file permissions, process management, Bash, Python (boto3)
- **Version Control:** Git, GitHub

PROJECTS

Multi-Environment AWS Infrastructure | Terraform, VPC, EC2, Security Groups | *In progress* | GitHub

- Writing reusable Terraform modules (network, security, compute) for separate Dev, Staging and Production environments, each with its own VPC, settings and state.
- Network: VPC with public and private subnets, Internet Gateway and route tables. Left out the NAT Gateway to keep costs low.
- Security: frontend open only on HTTP/HTTPS, backend reachable only from the frontend Security Group. No SSH; shell access will go through AWS Systems Manager.
- Compute: Amazon Linux 2023 instances with IMDSv2 enforced, encrypted gp3 volumes and instance types set per environment. All resources tagged and provider versions pinned.

CI/CD Pipeline for Automated S3 Deployment | GitHub Actions, IAM OIDC, S3 | GitHub

- Set up a GitHub Actions workflow that syncs the site to S3 on every push to main, so there are no manual uploads.
- Used IAM OIDC federation instead of stored access keys; the workflow assumes a scoped IAM role with short-lived credentials.

AWS Cost Optimization System | Lambda, CloudWatch, EC2, S3, Python | GitHub

- Connected a CloudWatch alarm (EC2 CPU below 5%) to a Lambda function to flag idle instances.
- Wrote the Lambda in Python (boto3): it labels each instance IDLE, NORMAL or HIGH LOAD and suggests an action. Tested with simulated CPU events.
- Saved every result as a timestamped JSON file in S3 to keep a history of decisions.

Static Website with Global CDN | S3, CloudFront, Route 53 | GitHub

- Hosted a static site on S3 behind CloudFront with HTTPS redirect and caching, on a custom domain set up in Route 53.
- Took the setup down after testing to avoid AWS charges; screenshots and demo videos are in the repo.

CERTIFICATIONS & TRAINING

- AWS Skills Centers: Becoming a Cloud Practitioner, Parts 1 & 2, AWS Training and Certification (Sep 2026)
- AWS Foundations: Getting Started with the AWS Cloud Essentials, AWS Training and Certification (Aug 2026)
- Learn Linux, Boot.dev (Jul 2026)
- AWS Networking Basics, Coursera | AWS Zero to Hero, TrainWithShubham
- Introduction to Cloud Computing, IBM SkillsBuild (Jul 2025) | AI for Business Professionals, HP LIFE
- 10+ hands-on AWS labs covering compute, networking, storage, databases and IAM

EDUCATION

Bachelor of Business & Information Technology (BBIT) Sep 2024 – Jun 2028 (expected)

University of the Punjab, Quaid-e-Azam Campus, Lahore

LEADERSHIP & COMMUNITY

- **General Body Member, AWS Student Builder Group, University of the Punjab** (Sep 2026 – Present): Spread awareness of AWS among IBIT students and help with registrations for AWS Student Community Day Lahore 2026.
- **Senior Member, Management Team, IBIT Sports Society** (Oct 2026 – Present): Plan and Coordinate University sports events; Captain of the IBIT University football team.
- **Organizer, Blood Donation Campaign 2025, BDS-IBIT Society**: Helped run the campaign and get students to donate; received a Certificate of Appreciation from Shaukat Khanum Memorial Cancer Hospital.
